

Erentzen/CSC301

Meeting Minutes
February 13th, 2021

Present

All present

Notes

- Discussion on solution for connecting POS with our application
 - Automation is desired but may not sure if it will be practical to automate it from the POS side
 - Instead we will allow merchants to upload spreadsheets instead
- User story review
 - For the first user story, take out the automation portion for the first deliverable
 - The rest of the user stories are clear and fitting with the expectation of the project
- Prototype Review
 - Functional difference between 'restock' page and 'inventory' page needs to be improved.
 - Recommend using Lucid to create flowcharts.
- Shopify Application Types
 - Explanation of standalone vs embedded apps from our research
 - Partner has no real preference but wants to consider restrictions and flexibility for future development
 - Group members are leaning towards embedded for better UI
 - Plenty of tutorials that explain the process
- Time for next meeting discussion
 - Next Friday at 11AM

Next Meeting

Will hopefully set up everything and wait for deliverable 2 details to be posted. Meeting next friday as usual.
